Since 2003

 TK Trading Co.

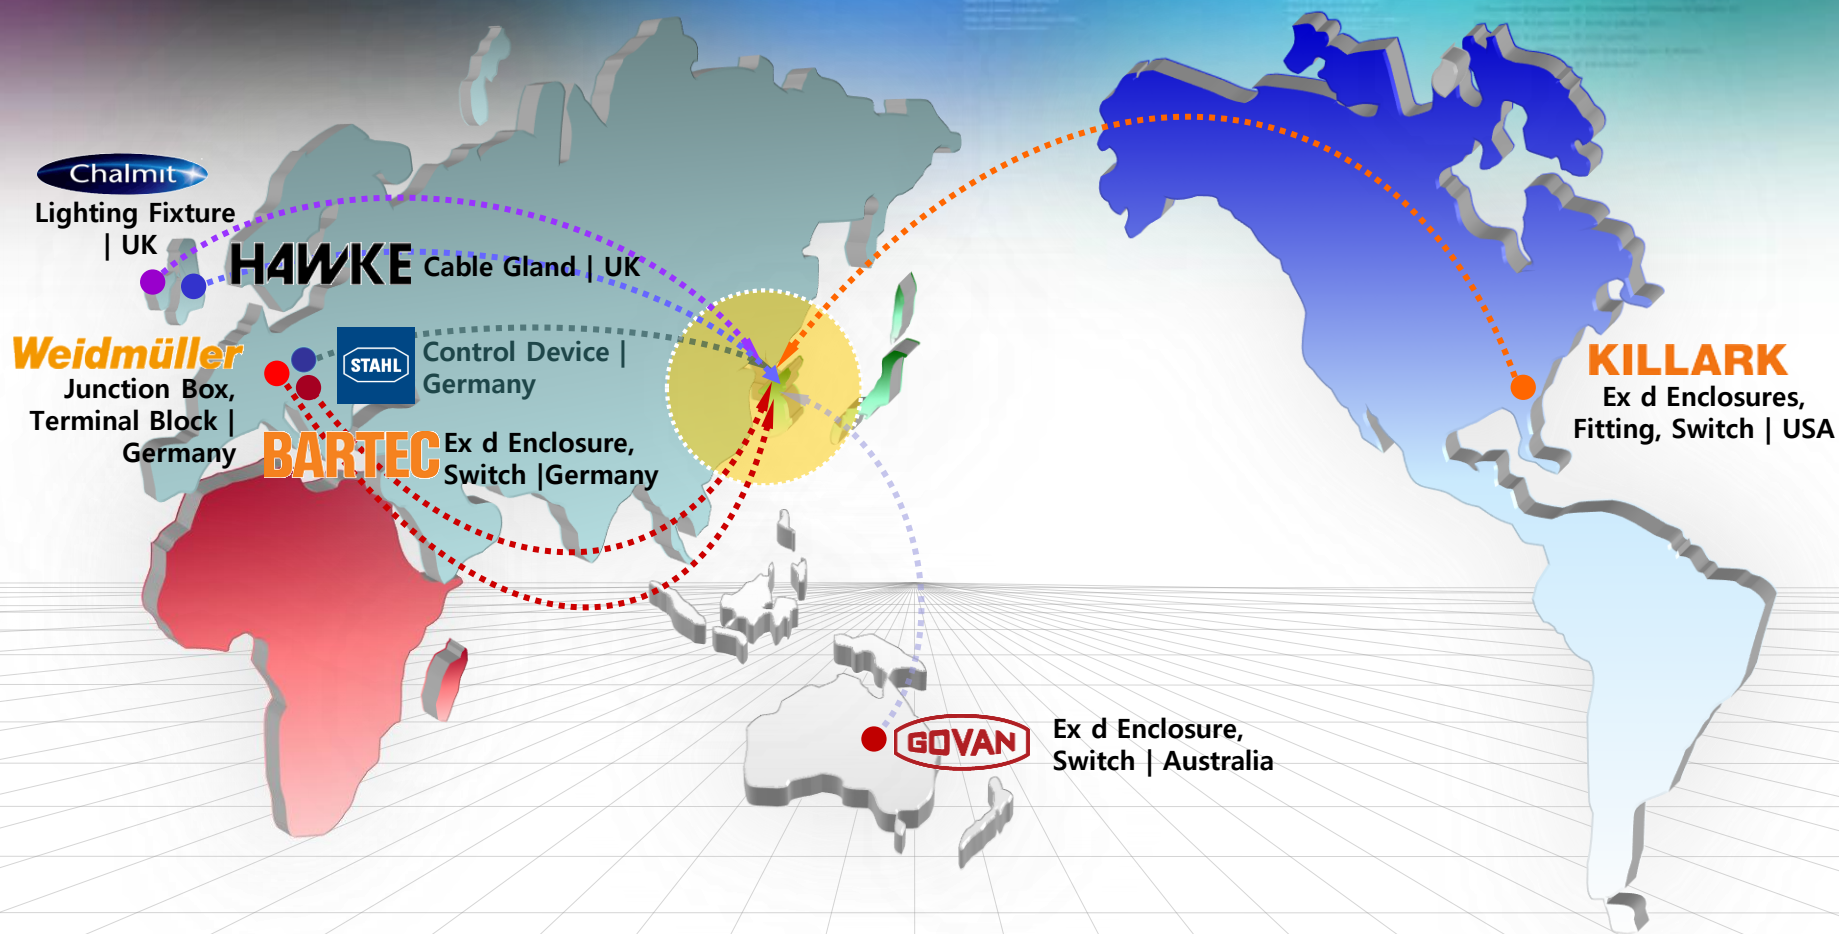

□ Overview : our vision

Founded in 2003, we, TK Trading Co, has accomplished continuous growth and development based on extensive knowledge and excellent management capability in the area of explosion proof application and solution. TK Trading Co. is committed to becoming the top-tier company by acquiring the drive through growth for expansion to network of explosive proof industry.

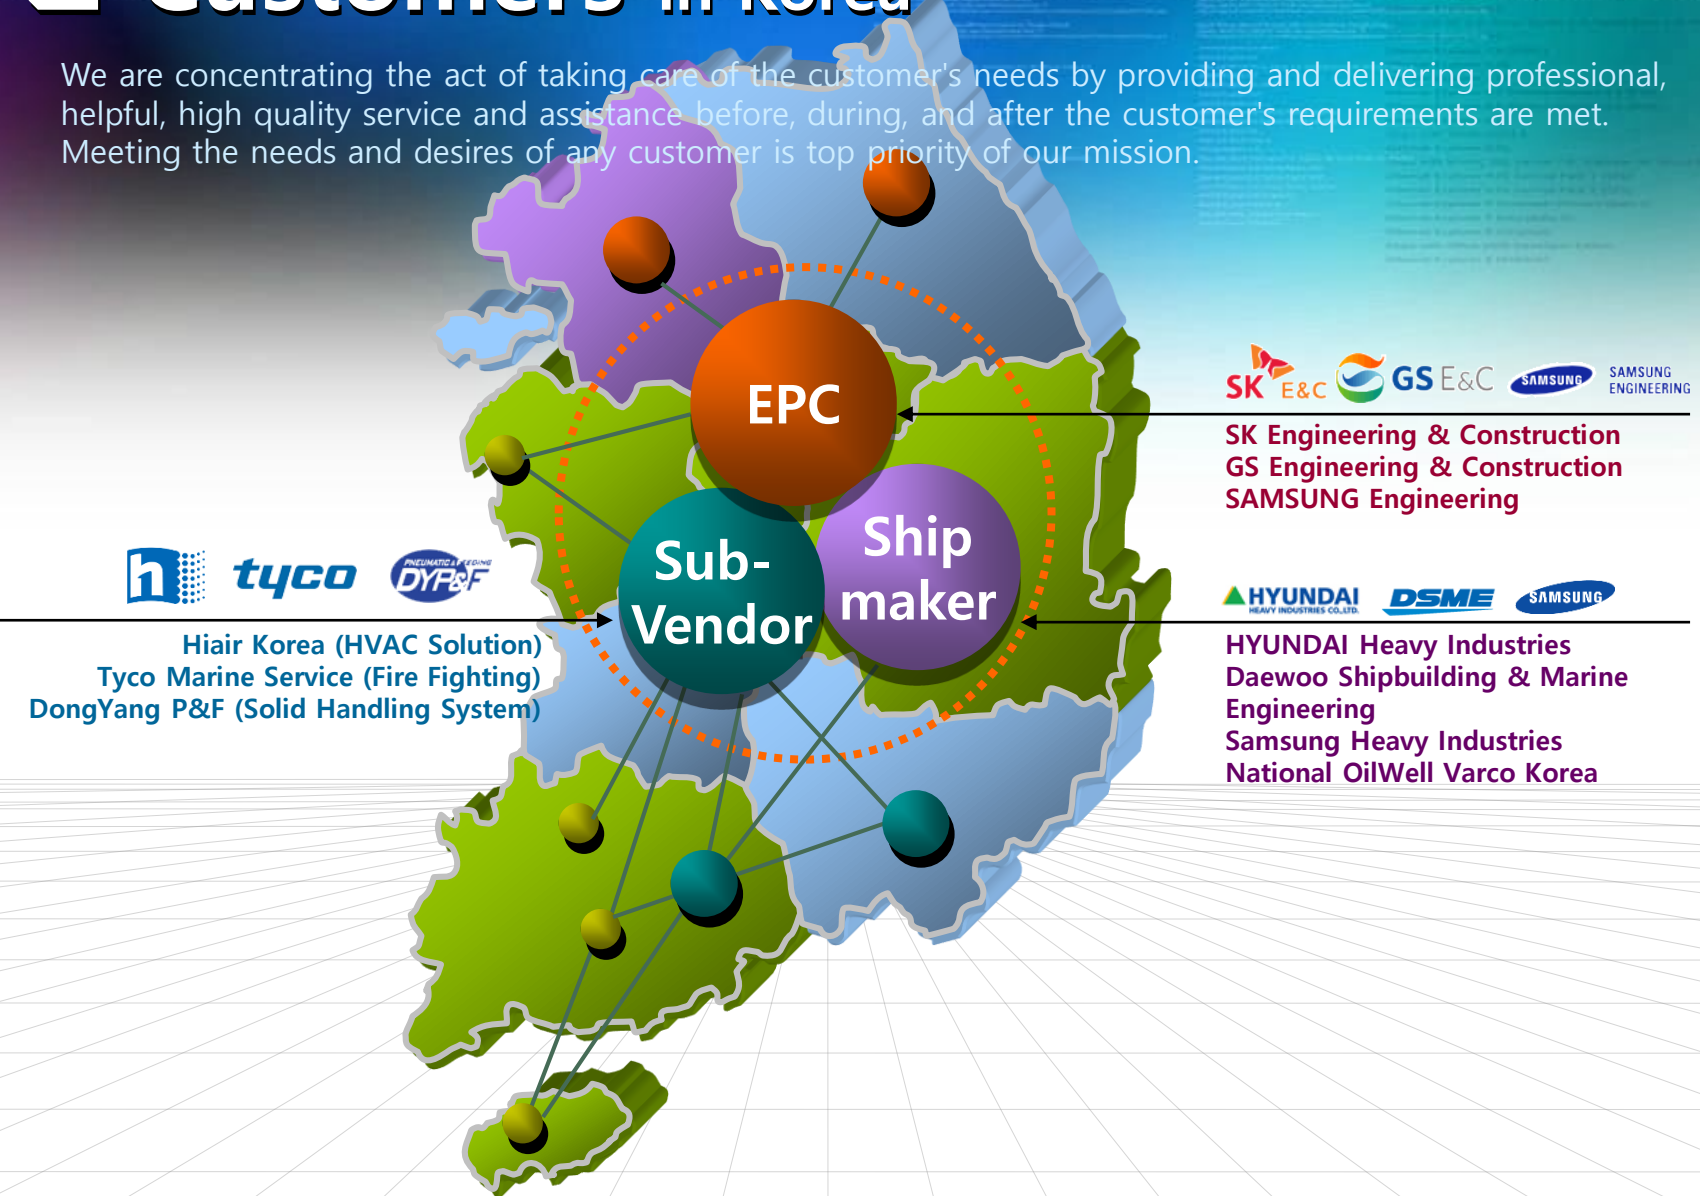

□ Applications From worldwide

TK Trading Co. is an official agent for Cable Gland (HAWKE), Terminal Block & Enclosures (Weidmuller), Enclosures, Receptacle & Plug (Killark), Lighting Fixture (Chalmit), Control Devices (R.STAHL), Ex d Enclosure and Local Control Switch (BARTEC)

□ Customers in Korea

We are concentrating the act of taking care of the customer's needs by providing and delivering professional, helpful, high quality service and assistance before, during, and after the customer's requirements are met. Meeting the needs and desires of any customer is top priority of our mission.

Product Line Up

STAHL

Control Station, Panel

If it is required to operate several control and monitoring units from a single point, it is convenient to combine them in control boxes. These are available in various sizes and versions in R.STAHL selection. Enclosures of glass-fiber reinforced polyester resin, high grade steel or painted sheet steel are used in larger control stations and control station combinations. They can be equipped with control, indicator, display and measuring devices according to what is ordered. Since there are so many combinations of components, there is no standardized sizing. Each control station is designed and built to order. Individual control stations can be combined to make larger units by using connection frames.

BARTEC Flameproof Enclosure

The BARTEC Ex d control panels are constructed according to protection type Ex d, flameproof encapsulation. Standard components such as switches, contactors and relays are mounted in an explosion proof enclosure constructed in such a way as to keep internal explosions from igniting the surrounding atmosphere. Ex d control panels are usually custom-built in close cooperation with the customer himself for his special application.

Product Line Up

Weidmüller Junction Box, Terminal

For a long time now, Weidmüller's W-Series terminal with screw clamp connection technology, has set the standard. The W-Series offers solutions for conductor cross-sections from 0.06 to 300 mm² and for all common electrical functions. Another advantage is the choice of plug-in (ZQV) or screw-in (WQV) cross-connections within one modular terminal. It brings considerable time savings compared to all other screw terminals on the market. Thanks to the patented design of Weidmüller's W-Series screw connection technology it is possible for two conductors of the same cross-section to be connected in one and the same clamping point without difficulty.

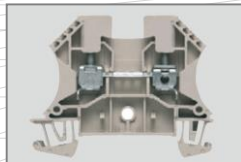

Simple Marking System
